Item No.	Description/Specification	Quantity
1	Lime dosing system partial upgrade: The current lime system is not working properly, and its operation poses a health hazard to the community and the workers which is in contravention of SANS 241 and Occupational Health and Safety Act & Regulations: Act 85 of 1993 respectively. The proposed upgrade will include the following: •Supply and deliver of a Counter-Balance Lifter / Stacker Retractable with the following specifications: - Capacity = 1500kg - Load Centre = 600mm - Lifting Height = 3000mm - Lowered Height = 90mm - Ground Clearance = 30mm - Length of Fork = 1125mm - Width across forks = 680mm - Battery / Charger = 2 x 12V/75Ah - Wheel base = 1235mm - Minimum turning radius = 1340mm - Driver motor = 24V/600W - Lift motor = 24V/2200W - Overall length = 1720mm - Overall Width = 800mm - Overall Height = 2035mm - Weight = 355kg •Cutting of an opening in the storage room wall facing the filters and the installation of an industrial roll up door. The opening must be 2400mm (w) x 2500mm (h)

	•Cutting of an opening in the hopper room wall facing the lime storage room and installation of an industrial roll up door The opening must be 2400mm (w) x 2100mm (h) •Manufacture, supply and install one additional (1) hopper with a size of 150-200 kg fitted with maintenance door at the bottom (constructed from stainless steel, that is dust tight, fitted with a tilt door and an arch breaker) Magalies Water will prefer not to use air and mechanical vibrators for this purpose. •Assessment of the existing lime mixing bowl and supply a new one (made from stainless steel, a volume of 200L). Note: The mixing tank must be circular in design and it must fitted with water jets installed at an angle at the bottom of the tank. •Assessment of the existing lime stirrers for their operational efficiency and installation of one (1) stirrer in the mixing bowl. The stirrer must be housed on a bracket above the mixing tank and not directly onto it. Note: a 2nd stirrer to be provided as readily available standby onsite •Provide a lid for the mixing tank to enable cleaning and suppress dust •Install the control panel for the stirrers, lime screw feeders and arch breaker on the wall located outside the dosing area. All the cabling must be housed in metal conduits •Install 75mm – 100mm two streams of open channel pipe (with a size of 1.5m each) from the mixing tanks to the dosing points •Install extended additional shelter between the dosing areas and dosage control panel area made of chromadek material that is painted in same colour as current site roof •Install additional shelter between the lime storage room and dosing area made of chromadek material that is painted in same colour as current site roof •The existing lime dosing room must be further protected from adverse weather conditions by extending the roof line by an additional 3,5m high and 5m wide. The roof of the structure must be made from chromadek and painted in a colour like the existing structures Compulsory site briefing to held as follows Magalies water Cullinan water purification plant 31 August 2026 10:00
