TRAINING SPECIFICATION

NOISE AND HEARING CONSERVATION

Course Objectives

The purpose of this training course is to provide employees with information on the hazards associated with noise and available control measures, the regulations associated with noise, the different noise levels, the impact on the human ear, all other requirements as per the Noise Exposure Regulations, 2024.

Course Outcomes

At the end of this course, with the use of the resources and facilitation media & methods, the learners must understand the requirements in terms of the following:

- a) the content and scope of the Noise Exposure Regulations, 2024, including Regulation 4;
- b) the potential sources of exposure to noise;
- c) the potential risks to health and safety caused by exposure to noise;
- d) the measures taken by the employer to protect an employee
- e) the precautions to be taken by the employees to protect themselves, including the wearing and use of ear-plugs and ear-muffs;
- f) the necessity, correct use, maintenance and limitations of hearing protectors, facilities and engineering control measures provided;
- g) the assessment of exposure, the purpose of noise monitoring, the necessity for medical surveillance and the long-term benefits and limitations of undergoing such surveillance;
- h) the noise-rating limit for hearing conservation and its meaning;
- i) the procedures for reporting, correcting and replacing defective personal hearing protectors and for engineering noise control measures; and
- j) the matters contemplated in regulation 5 on NIHL Regulations.
- k) The importance of having a noise and hearing conservation program
- l) the differences between sound and noise,
- m) legislative and regulatory requirements,
- n) equipment used to measure noise levels.

Duration of course: 1 day
